Site rental policy

A camping group counts for four persons or less. It can be four adults, two adults and two children, one adult and three children or three adults and one child, as long as they use the SAME CAMPING EQUIPMENT. Any supplementary person is considered extra, including a child.

The number of persons making up the camping group is the one determined AT THE TIME OF REGISTRATION. All other person that adds up afterwards, even if the original group is of only two persons, is considered a visitor.

We accept ONLY ONE EQUIPMENT AND ONE VEHICLE per site. We will accept an additional tent only if it is used by young children with one or two adults, or if it is used for storage purposes. In that case, it has to be left flat. A second tent must be signaled at the time of registration.

Whenever a camping group includes more than two adults and a second equipment is necessary, a different site must be rented. Even if the group uses only one vehicle, it is the number of camping equipments used that determines the number of necessary sites.

* Please note that any vehicle used to sleep in, as a van, is considered as camping equipment.
